Title :	Unregulated professional activities - ICT professional profiles - Part 6: Professional profiles related to the management of metrics and measurement of ICT products/services		
Scope :	Such proposal aims to use the tools provided by the related UNI 11621-1 ("Methodology for the construction of professional profiles based on the e-CF system") in order to define the third-generation professional profiles related to roles for measurement of ICT products and services preparing, elaborating and managing the organizational measurement system, supporting program/project managers. Such roles use standard methods and techniques in order to perform measurements, derive indicators and build related benchmarks. They define new measures starting from the standard ones to adapt them to their context. They analyze the measures to derive useful knowledge for the governance of processes and their improvement over time. They produce reports to support decision-making processes for the organization.

Title :	Smart tourism destinations. Semantics applied to tourism.		
Scope :	This standard defines a base semantics that allows to represent the relevant information in which the tourist destination is formed (tourist destination, tourist resources within the destination, travel experiences), ensuring - through its use - the interoperability of its tourist platforms and the city and territory among themselves and with third-party developments. This standard provides the tourist activity with a semantic data structure that makes it easier for developers to work, allows all actors to take full advantage of current technological potential, and facilitates the tourist that uses the destination platforms to access relevant information in an intuitive and agile way.

Title : Unregulated professional activities - ICT professional profiles - Part 6: Professional profiles related to the management of metrics and measurement of ICT products/services
Scope : Such proposal aims to use the tools provided by the related UNI 11621-1 ("Methodology for the construction of professional profiles based on the e-CF system") in order to define the third-generation professional profiles related to roles for measurement of ICT products and services preparing, elaborating and managing the organizational measurement system, supporting program/project managers.
 Such roles use standard methods and techniques in order to perform measurements, derive indicators and build related benchmarks. They define new measures starting from the standard ones to adapt them to their context. They analyze the measures to derive useful knowledge for the governance of processes and their improvement over time. They produce reports to support decision-making processes for the organization.

Title : Smart tourism destinations. Semantics applied to tourism.
Scope : This standard defines a base semantics that allows to represent the relevant information in which the tourist destination is formed (tourist destination, tourist resources within the destination, travel experiences), ensuring - through its use - the interoperability of its tourist platforms and the city and territory among themselves and with third-party developments. This standard provides the tourist activity with a semantic data structure that makes it easier for developers to work, allows all actors to take full advantage of current technological potential, and facilitates the tourist that uses the destination platforms to access relevant information in an intuitive and agile way.
