

CONTECHIN COMPANY INTRODUCTION

We are Czech company CONTECHIN s.r.o. that manufactures and offers complete microbrewery technology. Our company is a part of a consortium of companies – CONTECHIN GROUP since 1998. We have tradition, experience and know-how in the field of microbreweries and restaurants' environment.

MICROBREWERY TECHNOLOGY AND OTHER SERVICES

We focus on microbrewery technology with size of 300 – 5 000 ltrs per batch. This size is mostly suitable for smaller breweries that are looking for personal touch of their beer.

The final output capacity of the microbrewery is determined by the amount of CC tanks and other tanks, which can also be added later in the future. Every microbrewery is unique according to the customers requirements as well as the individual space.

CONTECHIN guarantees high quality Czech production of the key elements of the microbrewery from high quality stainless steel. Each tank is TÜV certified. Another great advantage of our technology is its multiple purpose. You can brew all types of beer there. You can adjust your offers to season and National holidays to brew specials. It is users friendly and during its assembling you get our chief assembler and a brewmaster for a month to teach you the whole process of brewing and maintenance of the microbrewery. On top of this you also get to learn a recipe for a traditional Czech lager. We can also help the customer to get the raw materials from the Czech republic if required.

BASIC INFORMATION ABOUT THE PRODUCT

From the marketing point of view, microbreweries are very good tool for diversification. It is suitable for bar/restaurant/pub owners as well as for brewers to brew brands for the market. The main difference between industrial beer and beer from microbreweries is at its taste and content of vitamins. We call beer from microbreweries "alive beer" because of its process of brewing. There is usually no filtration and pasteurization. That's why this beer is meant for quick consumption. Let's say within 6 weeks.

Always depends on storage conditions. The brewhouse can be even a part of the interior of the restaurant so the customers could enjoy their beer in amazing atmosphere.

ABOUT THE BRAND CZECH CROWN RESTAURANTS®

Other part of the consortium of CONTECHIN GROUP is the company **Czech crown s.r.o.**. To bring more than just technology to our customers we created a „franchise“ project named Czech crown restaurants®. This brand has the best of everything what is to be offered to its customers in the field of the Czech cuisine, bevarages and hospitality. The project Czech crown satisfies even the most demanding customers. It combines tradition and modern design. Fits every space. For its customers offers maximum of comfort, pleasant environment,

quality cuisine, excellent beer and reliable service.

WHAT CZECH CROWN RESTAURANTS® CONTAINS

The heart of every Czech crown restaurant is its own microbrewery. Along with the microbrewery goes a design of a restaurant in Czech style - Czech crown restaurants®. The restaurant is designed according the available space and the purpose of a business plan. We cooperate with a successful designer who has many experiencies in designing interiors of restaurants to be comfortable for customers and practical for stuff.

Within this concept your customers will enjoy a taste of the best beer, get experience of the Czech culture and its unforgettable cuisine.

SUITABLE FOR

This is suitable for new business opportunities and/or for businessmen who think about new challenge for their existing pub/restaurant.

BREWERIES AND MICROBREWERIES

PACOVSKÉ
STROJÍRNY

BREWERIES AND MICROBREWERIES

An important and traditional part of the production programme of PACOVSKÉ STROJÍRNY is the production and delivery of process equipment for breweries and microbreweries with the production capacity of 250 hl/year to 400 000 hl/year. In cooperation with customers and other experts in the field, our qualified team of experts is able to design optimal technological equipment for new operations or plan the reconstruction and modernization of existing operations. The supplies of technological equipment for breweries and microbreweries are provided in high quality, which ensures reliability and long life. The professional workmanship of the equipment for breweries and microbreweries is also appreciated.
